Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, the claim is indefinite as being incomplete for omitting the increment value which is an essential element of the invention, such omission making it unclear how the delay is calculated. See MPEP § 2172.01.

As per claim 8, it is unclear what it means by the recitation “the programmable digital delay elements are arranged to be varied by altering the input lock signal”. Further, “the input clock signal” lacks a proper antecedent basis, and is unclear whether it refers to the “reference clock”.

As per claim 15, “the sampled base band modulated information” and “said data” lack proper antecedent basis.

As per claim 18, “the rising and falling pulse edges” lack a proper antecedent basis, and is unclear as to whose the “the rising and falling pulse edges” are.

As per claim 20, “the separate rising and falling edge delays” lacks a proper antecedent basis.

As per claim 22, the phrase “can be” is indefinite as whether the followed limitation is required by the claim; claims 26 and 27 also have the same problem. Further, “the difference in initialization values” and “rising and falling edge delay control” lack proper antecedent basis.

Art Unit: 2193

As per claim 23, it is unclear how the “increment value” is provided to and processed by the claimed apparatus.

As per claim 24, “the difference”, “the initialization values” and “the two accumulators” lack proper antecedent basis. Further, the recitation “according to the following equation;” is indefinite since there is no followed equation; claim 25 also have the same problem.

As per claim 28, it is indefinite as to what it means by the recitation “the answers of the pattern”.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
